

Future Second Graders

You have learned so much this school year. You are so smart and ready for second grade. Here are some things you need to do over the summer.

You will need to get and read the book Jigsaw Jones and the Case of the Marshmallow Monster by James Preller.

You also need to practice your math facts flashcards everyday. This is extremely important because you have worked so hard to learn them in first grade. I know you can do these facts, so keep working hard.

You will also need to read books everyday. The library has a great summer reading program where you can win prizes for reading. What a great way to practice reading!

Your school supply list will be sent sometime this summer.

Have a great summer!!
